

Cybernetics IoT (Internet of Things) products provide the connectivity of field parameters to monitor and control them remotely. IoT in combination with Data science and Machine learning will enable you to analyze, predict and improve giving tremendous value to your products and services.

Our products will provide the seamless connectivity between existing industrial products/ instruments/machines with the latest data technologies given by leading Cloud platform providers.

MBIoT - Ethernet

Note: The MBIoT_Ethernet supports 8 Devices

Features:

- Support up to 80 parameters.
- Can connect up to 8 instruments to MBIoT_Ethernet .
- Remote configuration of all Modbus registers and devices
- MQTT Protocol with JSON data format

Specifications:

- Dimensions : 115x 90 x40 mm.
- Power Supply : 110V- 230v. 5 watts
- Interface : Isolated RS 485 .
- Output : Ethernet (Compliant with ISO 802-3/IEEE 802.3 (10BASE-T)).
- Mounting : DIN / Wall Mount
