

DATA CONVERTERS

USB TO RS232/RS485

FTDI chip based Industry standard USB to RS232 /RS485 converter for connecting devices or instruments to Windows/Linux based computers over RS232 or RS485 bus

FEATURES

- 1) FTDI chip
- 2) Slide switch for RS232 or RS485 selection
- 3) USB powered
- 4) USB cable of one meter length
- 5) Data Transmit and Receive Led Indications
- 6) Maximum bus protection for RS232 and RS485 lines
- 7) Adds Virtual COM port in computer when drivers are installed

USB TO TTL CONVERTER

FEATURES:

- 1) FTDI Chip based
- 2) Cable Length 2 meters
- 3) Available in 2.54mm, 2mm, 1.27mm pitch connectors on TTL Side
- 4) Inbuilt ESD Protection
- 5) Transmit and Receive LED indications
- 6) Adds virtual com port in computer when connected and drivers are installed
- 7) Can be used directly for Rabbit Micro processors programming and Digi make Zigbee module configurations
